Prevent COVID-19 Spread and Social Distancing Protocol

*Do not enter if you have a cough or fever

Social distancing, also called “physical distancing,” means keeping space between yourself and other people outside of your home. To prevent the spread of COVID-19 and practice social or physical distancing:

1. **Stay at least 6 feet away from others**
2. **Cover coughs and sneezes with a tissue or your elbow**
3. **Avoid unneeded physical contact, including hand shaking**
4. **Do not gather in groups**
5. **Stay out of crowded places and avoid mass gatherings**

Other good hygiene practices to follow:

- Wash your hands regularly.
- Do not touch surfaces unnecessarily.
- Wipe down counter, printers and other surfaces after you touch them.

In addition to everyday steps to prevent COVID-19, keeping space between you and others is one of the best tools we have to avoid being exposed to this virus and slowing its spread locally and across the country and world.

_Be Safe, Respectful, and Responsible. Together we will get through this._
